INTEGRATION OVERVIEW

DIRECT ENDPOINT MANAGEMENT

PLUGIN FOR NinjaOne

Progress. Protected.

Benefits

COMPREHENSIVE, CROSS-PLATFORM SECURITY

Offer best-of-breed antimalware options to your network of managed Windows and macOS clients. Replace existing solutions for ESET's clients requiring low system resource usage and proactive detection of multiple threat vectors using advanced malware detection technologies.

EASE OF MANAGEMENT

The familiar NinjaOne cloud console provides ease of management and adoption of ESET solutions thanks to the tight integration with NinjaOne via the plugin.

SATISFIED END USERS

Real-time monitoring and remediation helps resolve security issues quickly and makes for confident helpdesk techs and satisfied end users.

SYSTEM REQUIREMENTS

ESET Business Product Licenses

Active licenses of any of the following ESET endpoint products:

- ✓ ESET Endpoint products for Windows and macOS
- ✓ ESET Server products

For the complete list of supported ESET products visit help.eset.com.

NinjaOne

ninjaOne

The cloud-based remote management and monitoring tool NinjaOne offers MSPs a simple and efficient way how to monitor servers and endpoints for their customers, run on-demand tasks or connect instantly if needed.

Leveraging the NinjaOne agent, ESET Direct Endpoint Management plugin for NinjaOne makes it easy to deploy and activate ESET endpoint protection software. The plugin offers a wide range of functionalities, enabling MSPs to manage endpoint security from the familiar NinjaOne dashboard, without the need to run an additional management console.

Features

MANAGE CLIENT ENDPOINT SECURITY

Initiate on-demand endpoint scans, module updates and ESET security product activation, without requiring an additional console.

PROTECT ENDPOINTS, SERVERS AND EMAIL

Easily install and activate ESET endpoint platform solutions covering your customer endpoints, as well as file and mail servers.

MANAGE CLIENT CONFIGURATIONS

Set ESET-specific configuration policies on Windows® endpoint and server clients. Create new policies or upload existing XML configurations exported from the ESET security software. Manage every available ESET configuration option including Spam, Firewall, HIPS, Device Control and Web Control modules.

THREAT MONITORING

Get a comprehensive view of ESET Scan Logs, Threat Logs and Protection Status directly in NinjaOne, as reported to Windows Event Log, updated based on a custom interval.

REPORTING AND ALERT MANAGEMENT

Automatically run remediation actions based on reported ESET Errors, ESET Warnings and ESET Information which are displayed directly in the NinjaOne platform.
