# ESET®

NOD32® ANTIVIRUS

Essential antivirus protection

2022
EDITION

ESET

NOD32® ANTIVIRUS

Fast and light, vital for gamers and everyday users that don't want any interruptions. Just install and forget.

Legendary NOD32 Antivirus

Protects you against all types of malware, including viruses, ransomware, worms and spyware.

Light on computer resources

Enjoy the full power of your computer. Play, work and browse the internet without slowdowns.

Uninterrupted gaming and videos

No system updates or annoying pop-ups while you play games or run a program in full-screen mode.

110M+
protected users worldwide

100+
prestigious VB100 awards

30+
years of cutting-edge cybersecurity

Award-winning protection

ESET ranks among the best in the industry, as evidenced by our multiple awards and certifications from organizations like AV-TEST and AV-Comparatives.

State-of-the-art technology

Advanced Machine Learning, DNA Detections and a cloud-based reputation system are just some of the cutting-edge tools developed in our 13 R&D centers.

Made in the European Union

ESET values, like integrity, social responsibility and independence, all stem from our European roots and are safeguarded by our private ownership structure.

ESET
NOD32® ANTIVIRUS

Making the internet safer for you to enjoy

Explore the great online, securely protected by award-winning ESET NOD32 detection technology. It's trusted by over 110 million users worldwide to detect and neutralize all types of digital threats, including viruses, ransomware, rootkits, worms and spyware. It also protects against techniques that seek to evade detection, and blocks targeted attacks and exploits. At the same time, its Anti-Phishing feature protects you from illegitimate websites that try to access your sensitive information, such as usernames and passwords.

You can transfer your ESET NOD32 Antivirus license to macOS.

Antivirus and Antispyware	Provides proactive protection against all types of online and offline threats and prevents malware spreading to other users.
Anti-Phishing	Protects your privacy and assets against attempts by fraudulent websites to acquire sensitive information such as usernames, passwords or banking details, or feed you fake news from seemingly reputable sources. Protects you from homoglyph attacks (replacing characters in links with ones that look similar but are actually different).
Advanced Machine Learning	In addition to ESET Machine Learning in the cloud, this proactive layer runs locally. It is specifically designed to detect advanced, never-before-seen malware, while having a low impact on performance.
Exploit Blocker IMPROVED	Blocks attacks specifically designed to evade antivirus detection, and eliminates lockscreens and ransomware. Protects against attacks on web browsers, PDF readers and other applications, including Java-based software.
Advanced Memory Scanner	Enables improved detection of persistent malware that employs multiple layers of encryption to conceal its activity.
Cloud-Powered Scanning	Speeds up scans by whitelisting safe files based on the ESET LiveGrid® file reputation database. Helps to proactively stop unknown malware based on its behavior, by comparing it with our cloud-based reputation system.
Scan While Downloading Files	Decreases scanning time by scanning specific file types – such as archives – during the download process.
Idle-State Scanning	Aids system performance by performing in-depth scans when your computer is not in use. Helps detect potential inactive threats before they can cause damage.
Device Control	Allows you to prevent unauthorized copying of your private data to external devices. Allows you to block storage media – CDs, DVDs, USB sticks and disk storage devices. Lets you block devices connecting via Bluetooth, FireWire and serial/parallel ports.
Host-Based Intrusion Prevention System (HIPS) IMPROVED	Lets you customize the behavior of the system in greater detail, with a focus on behavioral detection. Gives you the option to specify rules for system registry, active processes and programs in order to fine-tune your security posture. Employs the latest tracing capabilities to scan parts of memory that can be modified by sophisticated malware injection techniques.
Script-Based Attack Protection	Detects attacks by malicious scripts that try to exploit Windows PowerShell. Also detects malicious JavaScripts that can attack via your browser. Mozilla Firefox, Google Chrome, Microsoft Internet Explorer and Microsoft Edge browsers are all supported.
Ransomware Shield	Blocks malware that tries to lock you out of your personal data and then asks you to pay a 'ransom' to unlock it.
UEFI Scanner	Protects from threats that attack your computer on a deeper level, even before Windows starts - on systems with the UEFI system interface.
WMI Scanner	Looks for references to infected files or malware embedded as data in Windows Management Instrumentation, a set of tools that manages devices and applications in a Windows environment.
System Registry Scanner	Looks for references to infected files or malware embedded as data in the Windows System Registry, a hierarchical database that stores low-level settings for the Microsoft Windows operating system and for applications that opt to use the registry.

Enjoy the full power of your computer

Leaving more power to the programs you use daily, ESET NOD32 Antivirus lets you play, work and browse the internet without slowdowns. Stay unplugged and online longer with battery-saving mode, and enjoy gaming without distracting pop-ups.

Small System Footprint	Maintains high performance and extends the lifetime of hardware. Fits any type of system environment. Saves internet bandwidth with extremely small update packages.
Gamer Mode	ESET NOD32 Antivirus automatically switches to silent mode if any program is run in full-screen. System updates and notifications are postponed to save resources for gaming, video, photos or presentations.
Portable Computer Support	Postpones all non-actionable pop-up windows, updates and system-hungry activities to preserve system resources so that you can focus on gaming or films.

Install and forget, or customize to meet your exact requirements

Delivering top protection right from the start with its default settings, ESET NOD32 Antivirus keeps you informed about potential security issues and lets you address them directly from the main screen. Its sleek user interface is designed to let you easily set up all routine tasks.

One-Click Solution	Lets you view your protection status and access the most frequently used tools from all screens. Offers comprehensive, one-click solutions to potential issues.
Smooth Product Upgrades	Benefit from new protection technologies as soon as they become available, for a continuously high level of security.
Settings for Advanced Users	Offers in-depth security settings to fit your needs. Allows you to define maximum scanning depth, scanning time, size of the scanned files and archives, and much more.
ESET SysInspector®	An advanced diagnostic tool that captures critical information from the system to troubleshoot a broad range of security and compatibility issues.
Security Report	Gives you a monthly insight into how ESET protects your computer. This summary includes information about detected threats, blocked web pages, intercepted spam emails, blocked webcam accesses and more.

Manage and maximize your security with ESET HOME

ESET HOME is a web portal and mobile app for Android and iOS that provides comprehensive oversight of ESET products, licenses and services on your devices. It's designed to be accessible whenever you need it, wherever you go. Get important security and license notifications, and check the security status of protected devices at any time. Install protection for new devices without typing your license key or login. Upgrade and renew your licenses. Add, manage and share licenses with family and friends. Manage Anti-Theft, Parental Control and Password Manager via the ESET HOME portal. All this and more is now available to you in one place, at any time.

Devices	Connect Windows and Android devices to your account via QR code, including Windows devices remotely, and check their security status at all times. Download and install protection for new devices and instantly secure them against threats.
Licenses	Add, manage and share licenses with family and friends. Upgrade and renew when necessary, and control at all times who else can use your license.
Notifications	Device, license and account notifications are part of both the portal and the mobile app. In addition to security and license information, available actions are detailed (only for Windows and Android OS).
