

ENCRYPTION SOLUTIONS

Data protection for businesses of all sizes

CYBERSECURITY
EXPERTS ON YOUR SIDE

Encrypting data on your endpoints can help you comply with data protection regulations

SATISFY LEGAL DATA PROTECTION REGULATIONS

By securely encrypting the personal data records you hold, your business or organization can better protect itself in the event of a system breach. That's because such incidents are much less likely to be considered a compliance failure by regulatory authorities if data is properly encrypted.

MONITOR ENCRYPTION ON USER MACHINES REMOTELY

Remote management simplifies admin duties and saves time. Go beyond management of security products and manage ESET Full Disk Encryption using the ESET PROTECT console. Or manage our full-featured encryption product using our hybrid cloud-based management server.

PROTECT DATA WITH A SIMPLE YET POWERFUL SOLUTION

With ESET encryption solutions you can safely encrypt hard drives, removable media, individual files and email, using the industry-recognized FIPS 140-2 validated 256 bit AES encryption standard for assured security. All with minimum interaction on the user side.

ESET Full Disk Encryption and ESET Endpoint Encryption use patented technology to protect data for businesses of all sizes

ESET Full Disk Encryption

Manage full disk encryption across your entire network from a cloud-based console—alongside other ESET security products. ESET PROTECT Center allows admins to deploy, activate and manage encryption on their connected endpoints with a single click. Full Disk Encryption (FDE) encrypts system disks, partitions and entire drives to ensure that everything stored on each PC or laptop is locked down and secure, protecting you against loss or theft.

ESET Endpoint Encryption

Provides additional protection. Users can protect individual items like files, folders, removable media and email. With file and email encryption, user data are protected when data is in transit, allowing secure collaboration. You can also manage remote devices via a proxy, eliminating the need for risky incoming connections and making management of encryption safe and simple for businesses of all sizes.

Which ESET encryption solution is best for you?

WHEN TO USE ESET FULL DISK ENCRYPTION

All products managed from one console. IT admins deal with remote management on a daily basis. ESET Full Disk Encryption works within the ESET PROTECT console, helping administrators to save time thanks to familiarity with the existing management environment and concepts.

The essential encryption solution to achieve legal compliance. ESET Full Disk Encryption not only protects your company from data loss but also helps it comply with data protection regulations such as GDPR. This solution offers a simple and straightforward way to remotely encrypt data at rest on each end-user's device.

Cross-platform coverage. Manage encryption on Windows machines and native macOS encryption (FileVault) from a single dashboard.

WHEN TO USE ESET ENDPOINT ENCRYPTION

Granular data protection. All companies have sensitive data such as customer lists, proprietary information and sales-related data. ESET Endpoint Encryption gives companies enhanced ability to protect specific **files, folders, virtual disks or archives.** Ideal for organizations with a shared devices policy and advanced encryption requirements.

Protect data in transit. With ESET Endpoint Encryption not only data at rest on company machines are protected. By encrypting emails and attachments, and restricting access to removable media for specific users, you can protect data in transit and prevent their leakage outside the company.

FEATURES

	Per device	Per user
✓ Full disk encryption	●	●
✓ Manage encryption on Windows	●	●
✓ Manage encryption on macOS	●	●
✓ Removable media encryption	●	●
✓ File and folder encryption	●	●
✓ Outlook plugin for email & attachments	●	●
