

ESET Smart Security 4 – Business Edition

Maintain the highest level of security across all of your networks

ESET Smart Security® combines an advanced management console and award-winning ThreatSense® engine with firewall and antispam modules that stop plain and SSL-encrypted network- and email-borne threats. Automatic, frequent signature updates and proactive heuristic technologies let your users focus on business while you remain confident your company's infrastructure is protected. Honored with a "★★★★★" rating by *SC Magazine* (January 2009), and ranked highest on *Forbes* list of best-in-class antivirus products, ESET Smart Security has the proven power to protect your company's valuable data and reputation.

Endpoint security management made easy

Ease of management is as critical as the effectiveness of your endpoint security solution. ESET® Remote Administrator 3 provides a comprehensive management console so you can control your entire network from one place—whether you support ten computers or thousands. Installation, updates, alerts, reports and other tasks are all easily managed from intuitive screens. ESET Remote Administrator has a small footprint and is highly scalable. It makes managing our security solutions simple for businesses of all sizes.

KEY FEATURES — ESET Smart Security 4

Fully integrated protection	ESET Smart Security integrates our powerful antivirus engine with state-of-the-art personal firewall and antispam modules — offering comprehensive protection to the workstations across your network.
Extremely light system footprint	ESET Smart Security is so light your users will not even notice it running.
Advanced archive scanning	Threats don't always enter where you expect. ESET Smart Security can scan into layers of compressed files to ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.
Encrypted communication control	Scanning SSL-encrypted HTTP and POP3 protocols defeats even threats that hide from plain sight.
Enhanced portable computer support	Enhanced settings for portable computers allows tasks to be postponed when the computer is running on battery power
ESET SysRescue	Creates rescue CDs, DVDs or USB drives for cleaning unstable, infected systems.
ESET Sysinspector™ integration	Administrators will love our advanced diagnostic tool for taking "deep-dive" snapshots of systems. Files and processes are color coded in scan logs to make it easy for IT admins to identify potential threats in the system.
Uninstall password protection	Password protection that prevents ESET Smart Security from being uninstalled by unauthorized employees or visitors.
Extended email client support	Native support for Microsoft Outlook, Microsoft Outlook Express, Mozilla Thunderbird, Windows Live Mail and Windows Mail makes messaging security simple. POP3 and IMAP protocols support delivers the same protection to other email clients.
ESET self defense and HIPS	ESET Smart Security has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorized attempts to modify your OS or applications are actively blocked through a combination of advanced behavioral analysis and network filtering that monitor your system processes, files and registry keys.
Removable media access control	Protects against infections from USB drives, floppies, CDs and DVDs.
Improved cleaning	Cleaning of certain difficult to remove infections has been significantly improved.
Support for Cisco Network Admission control	Regulatory compliance is simplified with native support for Cisco NAC.
Mirror updating	Mirror servers make it easy to manage distribution of signature database updates to all ESET products within the network, saving you valuable time and bandwidth.

KEY FEATURES — ESET Remote Administrator

Multiple database support	Native support for Oracle, MS-SQL Server, MySQL and Microsoft Access allows increasingly large deployments and runs significantly faster.
Policy management	Define and enforce policies consistently throughout your network. Policy Manager makes it easy to apply, inherit and merge policies in a variety of ways. Time-saving replication policies allow multiple ESET Remote Administrator servers to synchronize efficiently in wide area network deployments.
Notification management	Notifications are highly customizable and allow for monitoring of a broad range of incidents (status of clients, possible virus outbreak or network attack, new client event, finished task, license expiration or server errors and warnings). Notification actions include email, SNMP Trap, launch on server and log entry.
License management	Easily manage multiple licenses with different terms. Even merge licenses of different customers through a special license key. License Manager makes monitoring unused clients and pending license expiration from one console a snap.
Read only access	Now it is easy to delegate or share management responsibilities of large deployments without risk of multiple administrators overwriting critical configurations.
Active directory synchronization	Eliminate the time-intensive and error-prone task of creating groups by importing organizational structures directly from Active Directory.

SYSTEM REQUIREMENTS

ESET Remote Administrator Console

Operating systems	Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2003, Microsoft Windows Server 2008
Internet Explorer	minimum 4.0, recommended 5.5. Some reports may not display correctly in version 4.0

ESET Remote Administrator Server

Operating systems	Microsoft Windows NT4 SP6*, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2003, Microsoft Windows 2008 *Windows NT4 – Access Components (MDAC) 2.5 Service Pack 3 must be installed
Example requirements	ESET Remote Administrator has minimal system requirements. For example, ESET Remote Administrator Server installed on a Microsoft Windows Server 2003 administering 500 clients only requires: 1 GHz Processor, 1 GB RAM, 2 GB free disk space, 100 Mbps Network Adapter

ESET Smart Security 4 — Business Edition

Processors Supported	Intel or AMD x86 / x64
Operating Systems	Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2000, Microsoft Windows Server 2003, Microsoft Windows Server 2008
Memory	48 MB
Disk space	32 MB (download) / 46 MB (installation)
