ESET®

REMOTE WORKFORCE PROTECTION

Why is **Protecting your remote workforce** Important?

When societal disruption occurs, enabling a work-from-home option is essential for business continuity. But in the effort to keep workers productive and the business running, hastily extending a remote work option can leave your organization vulnerable in terms of security.

If there's one thing we know about cybercriminals, it's that they don't hesitate to jump on opportunities. Scammers can tap into current news and switch gears to leverage any significant change to their benefit. The risks this brings are further amplified by large numbers of the global workforce switching to working from home.

The radically changed scale of telework/home office and the heightened scam threatscape have the potential to multiply the challenges facing enterprises and businesses of all sizes. Securing access via VPN and leveraging both multi-factor authentication and encryption are all good moves in helping secure your employees and your critical business data.

However, that still leaves the door open to considerable risks for corporate devices outside corporate networks and to malware targeted at corporate networks via online channels. (Malicious email, web contents, social engineering, etc.)

To counter them, we recommend enabling our **Cloud Sandbox Analysis** add-on – **ESET Dynamic Threat Defense (EDTD).** EDTD provides additional protection through its inclusion in ESET File Security and our Endpoint Protection products, and utilizes a cloud-based sandboxing technology and multiple machine-learning models to detect and block never-before-seen threats.

Secure your remote workforce and improve your IT security with the help of our ESET Remote Workforce Protection solutions, which help you guard the company communications and IT's perpetual weak spot, the human factor.

ESET Remote Workforce Offer

BUSINESS

ENDPOINT AND SERVER SECURITY

New generation of ESET Endpoint Protection Platform with strong capabilities in the prevention of malware, exploits and **ransomware**. It leverages ESET's multilayered approach incorporating machine learning, advanced behavioral analytics, big data and technological expertise.

- **ESET's Endpoint security solutions** leverage multilayered technologies in dynamic equilibrium to constantly balance performance, detection and false positives.

- **ESET's File server security** provides advanced protection to all network file storage, general servers and multi-purpose servers. Ensures servers are stable and conflict-free.

- Maintain visibility and management of on-premise and off-premise endpoints with **ESET Cloud Administrator**.

BUSINESS

CLOUD-BASED SANDBOXING

ESET Dynamic Threat Defense is a cloud-based sandboxing solution. It evaluates the behavior of submitted samples with threat intelligence feeds, ESET's multiple internal tools for static and dynamic analysis and reputation data to detect **zero-day threats**. It provides your company IT Security with:

- Behavior-based Detection
- Machine Learning
- Zero-day Threats Detection
- Cloud Sandbox

BUSINESS

FULL DISK ENCRYPTION

ESET Full Disk Encryption provides powerful encryption managed natively by ESET remote management consoles, and increases your organization's data security to meet compliance regulations.

- Encrypt system disks, partitions or entire drives
- Manage from **ESET Cloud Administrator**.
- Deploy, activate and encrypt devices in a single action

About ESET

For more than 30 years, ESET® has been developing industry-leading IT security software and services, delivering instant, comprehensive protection against evolving cybersecurity threats for businesses and consumers worldwide.

ESET is privately owned. With no debts and no loans, we have the freedom to do what needs to be done for the ultimate protection of all our customers.
