ESET REMOTE ADMINISTRATOR PLUGIN FOR KASEYA

Kaseya[®] Virtual System

Administrator™ is widely used to manage a variety of IT services including antimalware and endpoint security. ESET now offers a solution for delivering best-in-class malware protection through the Kaseya environment.

The ESET Remote Administrator

Plugin for Kaseya integrates with the Kaseya Virtual System Administrator to provide central management of ESET Endpoint Solutions across distributed networks. Controlling ESET's powerful, proactive malware detection using Kaseya's familiar console delivers ease of administration and a common interface for configuring and reporting.

Benefits

Expanded options	Offer additional antimalware options to your network of managed clients. Replace existing solutions with ESET's lightweight clients for low system resource usage and proactive detection of multiple threat vectors.
Ease of management	The familiar Kaseya console provides ease of management and adoption of ESET solutions without requiring a second console.
Satisfied end users	Real-time monitoring and remediation helps resolve security issues quicker and makes for confident helpdesk techs and satisfied end users.

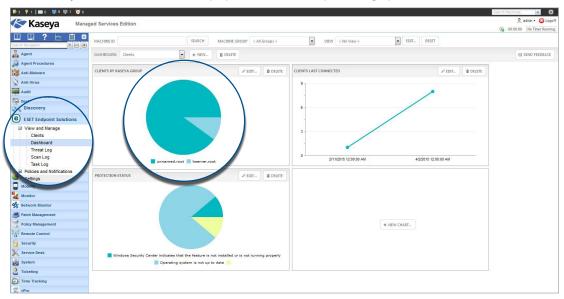

Features

Manage client endpoint security	Deploy ESET endpoint software directly from your Kaseya console. Initiate on-demand endpoint scans and virus signature database updates. Customize and sort your client display with over 20 client attributes.
Manage client configurations	Set ESET-specific configuration policies on Windows [®] , Mac [®] or Linux™ clients.
Monitor threats	View and sort threat data, choosing up to 15 threat attributes to display.
Dashboards	Customize your dashboard view to display threat data in easy-to-read graphs and charts. Dashboards show client, threat and scan information broken down by Kaseya organization
Reporting	Create report templates and generate PDF reports using the Kaseya Info Center.
Alerts	Create Kaseya alerts for specific machine groups, based on selectable client status triggers such as: detected threats, virus definitions or license out of date, client reboot or no connection to ESET Remote Administrator after specified number of days. Set up alerts to either email IT technicians or run Kaseya agent procedure scripts. Trigger ESET scan and virus signature database updates.
Admin permissions	Define permissions for different user roles to allow or deny access to different product settings.

Easily manage ESET endpoints through familiar Kaseya console.
