Help, whenever you need it.

Skilled ESET technicians on call to support the IT security needs of your business
ESET Premium Support is designed to answer your queries promptly, resolve issues quickly and help you use the full potential of your ESET products.

**ESET Premium Support:**

- allows you to enjoy the maximum return on your investment in ESET products
- reduces complexity and ensures the operational continuity of your organization
- covers the entire lifecycle of the product, tailored to your specific environment
- helps you allocate security resources efficiently
NO MORE LEARNING CURVE
While our products are designed to be intuitive and have comprehensive accompanying documentation, many game-changing advanced features can be missed by your IT team or particular product settings can still be misunderstood, which may prevent them from executing vital operations.

FASTER RESPONSE, FASTER RESOLUTION
ESET Premium Support delivers a guaranteed, 24/7 response to any incident affecting the smooth functioning of your IT environment.

ENSURING BUSINESS CONTINUITY
Deploying new products without any previous knowledge can be tricky even for organizations with dedicated security and IT teams. The deployment and/or upgrade of new products into live environments without the required expertise presents a serious business continuity risk.

A FAST-TRACKED RESPONSE
Regular technical support staff can be unfamiliar with your issue or the details of your environment. It’s a very different story when you reach an ESET expert who knows your infrastructure and will be able to solve the issue effectively.

FINE-TUNING YOUR IT MACHINE
Purchasing and deploying hi-tech products unfortunately does not guarantee their seamless operation. Specific combinations of operating systems, hardware and software from different vendors may cause unexpected behaviors. Leave deployment to experts who can foresee clashes and incompatibilities and will take the right action quickly.

EXPERT COMPLIANCE
Many industries have strict compliance policies which require that products be deployed by authorized vendors.
