# SECURITY SOLUTIONS
FOR FINANCE & BANKING

ESET® ENJOY SAFER TECHNOLOGY™

Spend more time focusing on the needs of your financial institution and its clients, and less time worrying about security issues.

Worry less about security so you can focus on better serving your customers. Turn to ESET for an easy-to-implement, easy-to-manage solution that helps address key issues of compliance as well as IT governance frameworks. ESET, through its global presence and local partner network, can help you identify, configure and install the right solutions, mitigate risks, and plan for a quick recovery if an incident occurs. ESET solutions secure your data and keep your organization up and running so you are always ready to help your customers build a solid financial future.

Meet compliance requirements

Endpoints Security

Ensures that you comply with the current requirements for secure inbound/outbound communication, and secure access to your and clients' data, whether it's online or offline.

ESET Secure Authentication

Adds an ultra-secure level of access to client and company data, and meets industry regulations for accessing sensitive data by using two-factor authentication (2FA).

Deslock+ Data Encryption

Meets standards for storing and handling confidential and private data, but still allows that data to be shared among authorized users.

Tailored security reports

No-hassle security audits that comply with the legal requirements of your regulatory authorities and demonstrate your commitment to client data security.

Mobile workforce secured

Data Access Protection

Keeps your mobile workforce's online and offline communications and your client and corporate data safe all the time, even when it's outside your company network.

ESET Secure Authentication

Only authorized users are able to access sensitive data and no extra hardware is needed – you just use your mobile phone to generate a unique password.

Deslock+ Data Encryption

ESET encryption keeps sensitive data secure even if it falls into the wrong hands. An easy-to-deploy and -manage encryption solution, which is scalable according to your needs.

ESET Endpoint Security for Android

Allows your admins to stay in control of all your devices without any need for a dedicated mobile device management tool, using ESET Remote Administrator.

Lower costs

RIP & Replace

ESET Endpoints solutions uninstall all redundant anti-malware software during their installation which makes migration to ESET fast, seamless and easy on your resources.

Automation by Agent

All tasks are run by an independent agent directly on the endpoint. IT administrators' day-to-day tasks are minimized, saving time and allowing them to focus on other important or sophisticated tasks.

Virtualization Support

ESET Shared Local Cache prevents scanning of the same files on all VMs. Your VMs run faster because ESET's anti-malware solution won't slow them down.

ESET License Administrator

You get the most out of your licenses, with no seat wasted, with clear overview of license usage in real-time.
Plan and manage resources better.

Choose from ESET's range of IT security products and services to secure your operation and your staff and clients' data.

The options below can be activated individually or in combination, for improved IT security.

Endpoints Security

- Antivirus and Antispyware
- Optimized for the Virtual Environment
- Anti-Phishing
- Web Control
- Device Control
- Firewall
- Low System Demands
- RIP & Replace
- Botnet Protection
- Vulnerability Shield
- Exploit Blocker

Server Security

- **Mail Security** blocks malware, spam, spear phishing scams and unsolicited email messages from entering company network
- **File Security** enforces antimalware on your servers, to keep the OS and confidential files free of threats.
- **SharePoint™ Server Security** protects client data for financial institutions that uses SharePoint as the storage engine.
- **Gateway Security** blocks inbound threats carried in Web and FTP traffic at the network perimeter

ESET Remote Administrator

- Web-console interface with drill-down possibilities
- Utilizes an independent remote administration agent
- ESET Remote Administrator also runs on Linux
- Possibility to deploy as Virtual Appliance
- Server/proxy architecture for network resilience
- Role-Based Management
- Secure peer communication
- Group-centric approach
- Rogue Detection Sensor

ESET Secure Authentication

- Ultra strong, super simple two-factor one-time password authentication
- Helps your operation to comply with industry regulations and keep staff and client data safe
- Easy one-tap installation on mobile phone or tablet
- Prevents security breaches by validating identities
- Designed for a mobile world
- No extra hardware keeps costs low and users happy
- Flexible integration options

ESET Technology Alliance: Deslock+ Data Encryption

- Simple and powerful encryption for organizations of all sizes
- Safely encrypts hard drives, removable media, files and email
- FIPS 140-2 Validated 256 bit AES encryption for assured security
- Hybrid-cloud based management server for full remote control of endpoint encryption keys and security policy
- Support for Microsoft® Windows® 8, 8.1 including UEFI and GPT
- Centralized management

Premium Support

- Highly-trained professionals are at your disposal 365/24/7
- Save on IT-related costs and free up your IT resources to focus on customer service provision
- Respond to security issues quickly and protect your reputation
- Get priority for your request to increase uptime

Multiple reasons cited for choosing ESET security

KEMBA Financial Credit Union purchased ESET security solutions because of high malware detection rates with low false positives, light footprints, positive reputation in the IT world, third party testing results, and value.

"ESET stays out of the way when it's not needed, and low resources are taken. It also has a great detection rate and is easy to administer."

Joe Whipple, Network Administrator, KEMBA Financial Credit Union

IT director says ESET delivers increased VM protection with fewer IT demands

FMS Inc, a financial corporation, noted the following results:

- — prevented possible fraud or theft of customer data;
- — protected organizational intellectual property and data;
- — freed IT resources to pursue other projects;
- — increased virtual environment protection with comprehensive endpoint protection at each VM; and increased end-user efficiency since deploying ESET security solutions.

Ric Burns, IT Director, FMS Inc
