Cybersecurity experts on your side

Your Enterprise cybersecurity partner trusted by customers and analysts alike
Expertise, integrity, independence: these are components we believe to be crucial for building our award-winning cybersecurity solutions.

At ESET, we don’t rely on a single magic formula. Instead, our elite experts combine decades of industry experience with deep knowledge of the subject and the power of machine learning to create unique multilayered protection. This approach, coupled with ESET’s professional service, is how we make sure that our customers will be safe from threats both existing and yet to come.

As renowned contributors to the cybersecurity community, we share valuable research, give lectures at universities and provide assistance to combat cybercrime. Our industry-leading blog, welivesecurity.com, is considered one of the best in the field.

We will always promote responsible practices in the industry, challenging empty claims and non-transparent methods.

We’re proud to be one of very few privately owned global cybersecurity companies. Without pressure from investors, we have the freedom to make the right choices – to do what needs to be done for the ultimate protection of all our customers.
ESET IS A RECOGNIZED & TRUSTED GLOBAL IT SECURITY PARTNER PROVIDING CUTTING-EDGE TECHNOLOGY & KNOWLEDGE INCORPORATED INTO OUR SERVICES & SOLUTIONS
For more than 30 years, we’ve been helping organizations and people protect their digital world. From a small dynamic company we’ve grown into a digital brand. Many things have changed, but our core aspirations, philosophy and values remain the same: to build a more secure digital world where organizations and people everywhere can truly Enjoy Safer Technology.

Richard Marko, Chief Executive Officer, ESET
ESET has been named a Challenger in Gartner’s 2018 Magic Quadrant for Endpoint Protection Platforms

The only Challenger in Gartner’s Magic Quadrant, ESET was evaluated on its ability to execute and completeness of vision in Endpoint Protection.

“\'We believe our positioning as a Challenger is a sign of our continued progress in delivering the best in endpoint protection to businesses, without impacting their systems or creating unnecessary overheads.\'”

Ignacio Sbampato
Chief Business Officer at ESET

ESET ENDPOINT SECURITY RECEIVED THE BRONZE AWARD IN THE 2017 GARTNER CUSTOMER CHOICE AWARDS FOR ENDPOINT PROTECTION PLATFORMS.*

The awards are a ranking of vendors by verified end-user professionals—which includes IT professionals or business users who have had experience purchasing, implementing or using the enterprise solution they are reviewing. The awards take into account both the number of end-user reviews and the overall user ratings.

One hundred sixteen enterprise-grade users awarded ESET Endpoint Security a score of 4.7 out of 5 across all criteria, praising the solution for integration and deployment, ease of deployment, service and support, timeliness of vendor response, and quality of technical support.

ESET is a Recognized & Trusted Global IT Security Partner providing cutting-edge technology & knowledge incorporated into our services & solutions.
Why customers trust ESET

(According to Gartner Peer Insights for Endpoint Protection Platforms)

“What we need is a small footprint, but also a very good antivirus ability. It should be a complete network security solution, not the kind of anti-virus toolbox packaged together. After trial and comparison, our department colleagues unanimously decided to choose ESET anti-virus software. In the using of ESET antivirus software, we really realized it’s light: the installation process is simple and fast, the virus database update speed (each virus database update is only a dozen K bits), update and scan do not impact the computer speed.”

Why customers rely on ESET technology

(According to Gartner Peer Insights for Endpoint Protection Platforms)

“Low system impact on performance. Very effective detection and heuristics. Many policy configuration options. Low false positives. Our previous EPP had many false positives. Too much time was spent having to address these false positives. After a year of ESET, up to now, we have not had one false positive. We have also noticed that the system resources needed for EPP are greatly reduced. Less memory and CPU usage. Also, network performance is notably better as well.”

Our products and technologies stand on three pillars

**ESET LIVEGRID®**
Whenever a zero-day threat such as ransomware is seen, the file is sent to our cloud-based malware protection system, LiveGrid®, where the threat is detonated and behavior is monitored. Results of this system are provided to all endpoints globally within minutes without requiring any updates.

**MACHINE LEARNING**
Uses the combined power of neural networks and handpicked algorithms to correctly label incoming samples as clean, potentially unwanted or malicious.

**HUMAN EXPERTISE**
World-class security researchers sharing elite know-how and intelligence to ensure the best round-the-clock threat intelligence.
Explore ESET world-class technologies

ADVANCED MEMORY SCANER
A unique ESET technology addressing heavy use of obfuscation and/or encryption. Monitors the behavior of a malicious process and scans it once it decloaks in memory.

BEHAVIORAL DETECTION AND BLOCKING
Monitors system activity and uses a predefined set of rules to identify and block suspicious system behavior from carrying out potentially harmful activity.

CLOUD MALWARE PROTECTION SYSTEM
Unknown, potentially malicious applications and other possible threats are monitored and submitted to the ESET cloud via the ESET LiveGrid® Feedback System.

RANSOMWARE SHIELD
Monitors and evaluates all executed applications based on their behavior and reputation. Designed to detect and block processes that resemble the behavior of ransomware.

“Excellent solution for our company.”

Why customers appreciate ESET’s knowledge and expertise

(According to Gartner Peer Insights for Endpoint Protection Platforms)

“ESET technical staff carefully designed a solution for our company, and rapidly deployed the Endpoint Antivirus trial version of ESET anti-virus software, killing a large number of circulating virus in the one-month trial period. It enhanced the speed of the network and improved our work efficiency, and ESET only takes up few system resources, running smoothly on the old computers. Good defense capabilities and efficient antivirus ability, along with excellent small footprint, make ESET antivirus software win compared to other brands.”

WE LIVE SECURITY BLOG AWARD
Global #1 Security blog
Almost 2 million Facebook followers
ESET is one of the few security vendors able to provide a consistent high level of protection based on our outstanding track record of research and technical innovation.

This allows us to stay ahead of malware, constantly evolving our technologies. Our unique combination of endpoint-based and cloud-augmented technologies provides the most advanced protection against malware on the market.

Our software performs consistently well in real-world situations. We make changes only in the quest for improvement. But as soon as we do make tested changes, they’re rolled out to you. As a result, our products are always the best they can be, and are updated and improved every day.

Through our cooperation with Google Chrome, ESET’s Chrome Cleanup scanner and cleaner helps countless millions browse the web safely and without interruption.

The security community around ESET has long been a breeding ground for innovative ideas about IT security. We are proud of our long tradition of cooperating actively with university research departments and contributing keynote presentations at cyber industry events. For an insight into our expertise and latest cybersecurity developments, visit welivesecurity.com.
OPERATION WINDIGO

Researchers assisted the FBI’s investigation into Operation Windigo, resulting in the arrest of the perpetrator. ESET provided the cutting-edge technical expertise needed to identify affiliate networks, shared sinkhole data to identify victims and produced a thorough technical report.

ESET’s report revealed that cybercriminals behind this operation were able to infect and exploit more than 25,000 Linux servers globally in order to generate more than 35 million spam messages daily to gather millions of dollars in fraudulent payments.
When the Ukrainian capital, Kiev, was hit by a blackout and the power grid was taken down by a cyberattack, ESET® researchers were the first to react. They analyzed the sophisticated new malware behind the attack, which they named Industroyer, the biggest threat to industrial control systems (ICS) since Stuxnet. According to ESET Senior Malware Researcher Robert Lipovsky, Industroyer was “a wake-up call for those responsible for the security of critical infrastructure (systems) worldwide.”
ESET IS A RECOGNIZED & TRUSTED GLOBAL IT SECURITY PARTNER PROVIDING CUTTING-EDGE TECHNOLOGY & KNOWLEDGE INCORPORATED INTO OUR SERVICES & SOLUTIONS
Why customers choose ESET’s services

ESET services are the perfect complement to our security software solutions. Tap into the tools and knowledge of our teams to diagnose and solve information security challenges. Our in-depth understanding of the technologies, resources and security requirements of our customers allows us to quickly identify issues, determine corrective action and offer a complete catalog of defined services, from implementation and customization to training and support. Our goal is to ensure that you get the most out of your investment in ESET information security products through professional consulting.

“We were most impressed with the support and assistance we received. In addition to being a great product, the excellent care and support we got was what really led us to move all of Primoris’ systems to ESET as a whole.”

Joshua Collins, Data Center Operations Manager
Primoris Services Corporation, USA and Canada, 4,200 seats

“Toward the past seven years of being an ESET user, never was there a time it failed me.”

ESET services

Our highly trained cybersecurity and threat professionals are at your disposal, providing immediate response and expert training to face new, unknown or advanced threats.

**ESET THREAT MONITORING**

ESET experts monitor your network and endpoint security, alerting you if something suspicious needs your attention.

**ESET THREAT HUNTING**

ESET experts help customers investigate data, events and alarms generated by ESET Enterprise Inspector. This includes root cause analyses forensic investigation, as well as actionable mitigation advice.

**ESET PREMIUM SUPPORT**

ESET Premium Support gives you 365/24/7 access to customer care specialists to get assistance when installing major upgrades, during migrations and with other tasks.

**IMPLEMENTATION SERVICES**

Tap into the know-how of our teams to solve the unique information security challenges your business might have, and ensure that you are set up for success by having the solution configured properly the first time.

**ESET AUTHORIZED TRAINING CENTER**

Quickly improve the skill set of your sales force and customer care representatives with free online training that was developed by security experts.

**ESET MICRO UPDATES**

Up-to-date security for operations with very limited internet access, e.g., via GPRS, satellite or radio.
Our goals for choosing our EPP were to improve our threat detection, add potentially unwanted software detection and provide enough configuration options to address a highly varied environment. ESET meets all these goals.

ESET has been exceptional at not only signature-based threats, but also heuristic detections. This improvement was done with a sharp decrease in false positives compared to our previous EPP, as well as a reduction in system resources required to provide this protection. Due to our complex environment, application whitelisting is not a viable option.

Our previous EPP did not detect potentially unwanted software. ESET has helped us identify, remove and prevent these unwanted applications from our devices. The management console provides a web-based method to manage all the configuration options and a dashboard view to provide a quick overview of the status of the environment.

In the two years we have worked with the ESET EPP, we have seen regular small changes to EPP features and management console options that add ongoing improvement in protections against new threats, adding new features and optimizing the interface for both the EPP and the management console.

ESET has also been very timely with updates for new versions of operating systems. In fact, ESET has the EPP ready long before we are ready to deploy new versions of the OS. With our previous EPP, we often had to wait months before new OS support was ready. We would test the new OS, and eventually the support from the EPP would arrive, and we had to wait to test again. Now we can test the EPP while testing the new OS version. This allows us to deploy new operating system versions more quickly.
