

Cybersecurity Road Map

Roll out an effective security policy in just six steps.

STEP A: ASSESS

- Catalog your digital and physical assets
- Determine risks to your systems

STEP B: BUILD

- Write your security policy statement
- Add policies for specific assets as needed

STEP C: CHOOSE

- Describe the controls that will enforce policies
- List any cybersecurity products you may need

STEP D: DEPLOY

- Test and evaluate as you deploy controls
- Identify and correct any problems

STEP E: EDUCATE

- Share policies with staff, vendors, clients
- Empower employees to report risky practices

- Periodically test and adjust defenses
- Audit systems for changes & threats

STEP F: FURTHER TEST
