

# SECURITY SOLUTIONS FOR HEALTHCARE

25 YEARS  
INNOVATIVE  
TOP-RATED  
ANTIVIRUS  
PROTECTION

Proven. Trusted.

**Worry less about security so you can focus on initiatives that improve patient care.** Work with ESET® and one of our local partners for an easy-to-implement, easy-to-manage solution to help address key issues of HIPAA and HITECH compliance. ESET will help you identify, configure and install the right solutions, mitigate risks and plan for a quick recovery if an incident happens. ESET solutions secure your data and keep your organization up and running so you can focus on the needs of your business, your patients and your practice.

## ESET® ENDPOINT SOLUTIONS

Fast, light protection against Internet threats for your organization's workstations.

- ✓ **Antivirus and Antispyware** counters online and offline threats with proven NOD32® technology.
- ✓ **Device Control** prevents malware from entering your organization's network via removable media.
- ✓ **Smart Firewall** blocks network access to and from rogue applications.
- ✓ **Content Filtering** limits website access to protect users from visiting suspect websites.
- ✓ **Remote Administrator** lets you easily manage all of your endpoints from a single console.

## ESET® SERVER SOLUTIONS

Protection for files stored on servers and additional layers of security for the network perimeter.

- ✓ **Mail Security** blocks malware, spam, spear phishing scams and unsolicited email messages from entering your network and disrupting your clinicians work.
- ✓ **File Security** enforces antimalware on your servers, to keep the OS and sensitive files free of threats.
- ✓ **SharePoint™ Server** protects patient data for healthcare organizations with an Electronic Healthcare Record (EHR)/ Electronic Medical Record (EMR) system that uses SharePoint as the storage engine.
- ✓ **Gateway Security** blocks inbound threats carried in Web and FTP traffic at the network perimeter, providing an additional line of defense.

## ESET® SECURITY EXTENSIONS

Security to safeguard confidential patient data and meet regulatory compliance mandates.

- ✓ **ESET Two-Factor Authentication** protects against unauthorized users logging in to your network and accessing confidential patient data, using passwords that might have been stolen or guessed.
- ✓ **FIPS 140-2 Level 1 Validated Encryption** through ESET Technology Alliance partner **DESlock+** makes patient data stored on removable drives, laptop hard drives or in email messages, unreadable to unauthorized parties, and gives your organization safe harbor from HIPAA Breach Notification Rule penalties in the event of a data breach.

# SECURITY SOLUTIONS

## FOR HEALTHCARE

### ESET<sup>®</sup> PROFESSIONAL SERVICES

Services from ESET and local partners support your continuing compliance and keep your business running.

ESET and its local partners offer:

- ✓ **Cyber Threat Assessments** to identify and remediate vulnerabilities in your environment.
- ✓ **IT/Internet Use Policy** review and recommendations to mitigate current and future risks, including those related to data breaches.
- ✓ **Implementation and Support Services**, from installation and customization to training and technical support, conducted on-site or remotely.

### ESET<sup>®</sup> BUSINESS SOLUTIONS

Bundled solutions give you the flexibility to implement an ESET security solution to fit your compliance needs now, and to add, renew and upgrade as your business grows and regulations evolve.

#### ESET Endpoint Protection Standard

Keep your network clean and protect your endpoints (computers, smartphones, tablets and file servers) against emerging threats and data theft with security that is easily manageable from a single console.

#### ESET Secure Business

Protect all computers, laptops, mobile devices and file servers—and prevent email-borne malware and phishing messages from reaching them—with Mail Security that hardens your network with an extra line of defense.

#### ESET Endpoint Protection Advanced

Build on the security of Endpoint Protection Standard by adding a firewall, antispam and content filtering—implementing additional layers of protection for your company network and mobile workforce.

#### ESET Secure Enterprise

Choose this option if you operate your own Internet gateway server. Safeguard your HTTP/FTP communications and block malware at your network perimeter while maximally protecting endpoints and servers.
